Introduction

Did you know? 78% of students waste over 10 hours weekly searching for reliable study materials, Masadir is here to solve that. Our app provides AI-powered academic support to help students study smarter, Not harder our smart mobile application, Masadir, addresses major pain points for university students.

Project Background & Motivation

①

Many students struggle with academic research and study strategies.

③

Masadir helps by providing AI-generated sources, writing templates, and custom study plans.

②

Designed specifically for university students.

Business Case

Objective:

Help students study smarter and improve academic performance.

Solution:

AI-powered mobile app.

Market Need:

Time-saving and effective study tools.

SWOT

1. AI-powered personalized learning.
2. Provides trusted academic sources.

1. Requires building user trust and loyalty.
2. High initial development cost.

1. Huge demand from university students for smarter studying tools.
2. Subscription model ensures stable, recurring revenue.

1. Privacy and data protection risks.
2. Licensing costs may limit access to premium academic content.

Project Charter:

Project Title

*Masadir AI-Powered Study
Support App*

Project Team

1. Wafa (Investor)
2. Ameer (Project Manager).
3. Osama (AI Developer)
4. Abdullah (UI/UX Designer)
5. Waddah (Data Analyst)
6. Abdulaziz (Marketing Specialist).

Risks

1. Access to academic content may be expensive
2. Hard to gain user trust
3. Need for privacy and data protection

Main Features

1. Course-based source suggestions
2. Writing templates
3. Custom study plans
4. User account & subscriptions

Scope Statement

Justification

- University students often struggle with identifying credible sources
- managing their study habits
- organizing academic writing.

Deliverables

- Mobile app (iOS & Android)
- AI integration
- Writing templates, study plans, academic content

Constraints

- 6-month timeline
- \$186,140 budget

Acceptance Criteria

- Stable app,
- accurate content,
- privacy compliance

High fidelity prototype

Lessons Learned & Team Reflection

Product Constraints:

Working within a fixed budget and timeline helped us sharpen our planning and prioritization skills.

Teamwork:

Regular meetings helped maintain alignment and quickly resolve issues

Challenges:

Data privacy concerns made us more aware of ethical and legal responsibilities.

Leadership:

Decisions about budgeting, functionality, and features were collaborative and data-informed.

The background is a deep blue gradient. In the lower half, there are several horizontal, wavy bands of glowing white and light blue particles, creating a sense of motion and depth, similar to a digital or scientific visualization.

THANK YOU
